POWERTRACK 800 TRACKED GRID

Technical Specification

The Powerscreen Powertrack is a high capacity heavy duty mobile scalping and conveying unit. Built to withstand the rigours of handling materials like rock or demolition concrete, this machine is equally at home when fine screening down to 10mm product size. The product design allows the machine to operate in very confined spaces and the high mobility factor eliminates set up time.

Features & Benefits

- High capacity up to 100 TPH, (depending on mesh sizes and material type)
- Quick set up time
- Maximum mobility with remote controlled track operation
- High performance hydraulic system
- Angle adjustable screenbox with radio control tipping screenbox
