

RUBBLE MASTER 70GO

Technical Specification

The RM 70GO! 2.0 is a compact and at the same time extremely high output mobile crusher. It meets the most demanding expectations in terms of flexibility and handling and processes a wide range of materials: rubble, asphalt, concrete and medium-hardness natural rock can be processed profitably thanks to advanced RM technology.

It produces up to 150 tonnes of cubic high-quality grain per hour. Weighing just 19 tonnes, the RM 70GO! 2.0 is amongst the most lightweight crushers. Moreover, the RM 70GO! 2.0 also has very low diesel consumption and is whisper quiet and low on emissions. Easy, compact and powerful.

Features & Benefits

- Throughput: Up to 150 t/h, depending on material
- Inlet opening: 760 x 600mm
- Crusher unit: Rubble Master HMH impact crusher with 2 or 4 hammers, 2 rotor speeds
- Power unit: John Deere, 4 cylinders, 115 kW at 1800 rpm

Weight & Dimensions

Gross Weight (kg): 19,500
