

WARRIOR 1400 SCREENER

Technical Specification

The Warrior 1400 is a flexible screening machine, aimed at operators who require a high performing, heavy duty, versatile machine that remains easy to transport. The Warrior 1400 is extremely efficient in screening and recycling applications and it can process sand and gravel, topsoil, coal, crushed stone, recycling, and compost.

Features & Benefits

- Screen Box screener 12'x 5' (3.6meter x 1.5meter)
- Feed hopper volume 8.87yards or 6.78m³
- Feed hopper belt with 51inch (1300mm)
- Diesel Engine Type Caterpillar
- Diesel Engine Rating 82KW (109hp)
- Oversize Material Discharge belt width 48inch (1200mm)
- Oversize Material discharge belt, stockpile height 11'10 (3.6meters)
- Mid-Size conveyor material discharge belt width 36inch (900mm)
- Mid-Size conveyor material discharge belt stockpile height 10'9" (3.3meters)
- Fines conveyor material discharge belt width 36inch (900mm)
- Fines conveyor material discharge belt stockpile height 11'4" (3.45 meters)
- Dimensions working position - length 44'4" (13.51 meters), Width 39 foot (11'880 meters), Height 10'6" (3.2 meters)
- Dimensions Transport length - 46'9" (14.25meter), Width 9foot (2.75M), Height 10'6" (3.2 meters)
- Weight 25'600 kgs
